## Challenges of Remote Working Trust, Surveillance and Artificial Intelligence

Online Dialogue, 9<sup>th</sup> February 2021, 16:00-18:00 CET

In collaboration with Microsoft, FASresearch and Lappeenranta University.

Dear Bianca Volk,

Trust has massively gained in importance during the last months, as physical distancing, remote working and virtual teams have become the new normal.

- How can managers and employees build mutual trust?
- Which emerging technologies could support, but also undermine, trust?
- Is Responsible Surveillance the solution or an oxymoron?

Join our second LIVING INNOVATION Online Dialogue [here](#) and

1. Learn how to build and retain trust through remote working;
2. Gain insights into network science and resilience; and
3. Explore the interlinkage between security, trust and employee empowerment.

[Register here](#)

The Dialogue addresses you as:

### Manager:

You face new leadership challenges, independently of the sector in which you work. In our series of Online Dialogues, you can share your experiences, gain insights into new technologies and reflect on their responsible use.

### Innovator:

Remote working will require a broad range of technologies and organisational changes. Learn more about the challenges as well as your target group's needs, and network with other experts and entrepreneurs.

### Researcher:

The future smart home office is a key example of Responsible Innovation. Be part of a network of experts, practitioners and policy makers to co-design the future of work.

### Trust and future of work

How to establish trust in knowledge work characterized by fast technological change and emerging technologies, such as artificial intelligence.

**Kirsimarja Blomqvist** is a professor for knowledge management at the School of Business and Management at LUT University, Finland. Her research and teaching focuses on trust, knowledge management, digitalization and new forms of organizing.

### Corona-crisis and (trust in) networks

A visionary understanding of network science and resilience theory.

**Harald Katzmaier** is the founder of FASresearch and a leading expert in the field of applied social network analysis with a focus on power relations, innovation and strategic situation analysis.

### Employee safety, security and wellbeing in a hybrid workplace scenario

How our new world of work demands an updated approach to security, trust and employee empowerment.

**Harald Leitenmüller** is CTO of Microsoft Österreich GmbH. He is a leading edge technology focused professional with 25 year of experience as a system designer, architect and business manager/leader in various industries.

Facilitated by [Svetlana Ivanova](#), Researcher at ISINNOVA - the Institute of Studies for the Integration of Systems and [André Martinuzzi](#), Coordinator of the LIVING-INNOVATION project and Head of the Institute for Managing Sustainability at WU Vienna.

The expert impulses are followed by in-depth conversations on:

- Trust-based Leadership
- Resilient Organizations
- Responsible Surveillance
