We Are Open
FLATTEN THE CURVE
NOT YOUR BUSINESS
Crisis-Driven Business Model Innovation
• We are eight research associates and PhD students from the Institute for Technology and Innovation management (TIM) at RWTH Aachen University.

• Together we participated in the #WirVsVirus hackathon of the federal government in March 2020 and developed the idea and a prototype for the platform “We Are Open”

https://www.youtube.com/watch?v=Wc8YLEQ81n0&list=PLYGe9q9_Jo3DGH-e-zs8C-gNfpOys8EnM6&index=10

• This idea was inspired by our research in the fields of business administration, e.g. business model innovation, platform economy, organizational change, innovation ecosystems and crowdsourcing.

• Supported by our institute director Prof. Frank T. Piller, we have continued to develop the project over the past weeks...
THE COVID 19 DILEMMA

WITHOUT RESTRICTIONS

WITH RESTRICTIONS

Recession

Patients

Time
ORGANIZATIONAL RESPONSES

RETAIL STORES: Customers shop via shop window by sending a foto of the dress to the shop owner. Thus, no need to go inside.

GYMS: Gyms offered part of their services via online platforms (e.g. Cyberobics), moved their courses outside or switched to online classes.

HOTELS: Instead of normal guests, hotels rented their rooms to people that needed a “home office place”.

CINEMAS: During COVID19 cinemas reinvented the car-cinema to generate revenue.
Some Companies make adjustments to their business model very quickly as they are affected by the constraints of the crisis (e.g. absence of customers or changes in demand).

These adjustments can be generalised and can to some extent be found in various companies. We have derived business model patterns for times of crisis from them.

On an open platform we want to present these business model patterns, give companies the opportunity to present their own patterns of resilient business models in times of crisis and discuss the concrete implementation together.

Although the “Corona crisis” serves as a current example here, companies or entire industries will continue to be affected by crises with specific consequences (e.g. a decline in demand) in the future.

By combining different concepts of innovation management, such as business model innovation, crowdsourcing, open innovation and platform business, we want to help companies to get through difficult economic times in the short term and perhaps even to build up a more resilient business in the long term.
• Gulanti et al. (2010) show that 17% of organizations do not survive a crisis, whereas 9% strive afterwards.
• 4 dominant strategies to respond to a crisis (Wenzel et al., 2020):
  • Persevering: Sustaining a firm’s business activities to preserve the status quo.
  • Retrenchment: Reduction of costs, assets, etc. (Pearce & Robins, 1993).
  • Innovation: Strategic renewal in response to a crisis
  • Exit: Discontinuation of a firm’s business activities (e.g. Argyres et al., 2015).
• Organizations that flourish after a crisis have balanced to cut costs but also invested in existing and new businesses (Gulanti et al., 2010).
• Literature limited to strategic perspective
• It remains unclear how companies implement these strategies.
RESEARCH OBJECTIVES

1. LEARNING ABOUT BUSINESS MODEL INNOVATIONS
   - Netnography
   - Historical crises
   - Crowdsourcing

2. DEVELOPING BUSINESS MODEL PATTERN IN TIMES OF CRISES
   - Aggregation
   - Categorization
   - Description

3. OBSERVE BUSINESS MODEL INNOVATIONS THROUGHOUT THE CRISIS
   - Barriers
   - Evolution
   - Effectiveness
Innovative Geschäftsmodelle teilen

Helfen Sie auch anderen Unternehmen Ihr Geschäftsmodell an die aktuelle Krise anzupassen. Sie haben eine tolle Idee, die wir noch nicht kennen? Senden Sie uns eine kurze Beschreibung.

Ihre Geschäftsmodellidee

Helfen Sie anderen Unternehmen Ihr Geschäftsmodell an die aktuelle Krise anzupassen oder Ihren innovativen Geschäftsmodell oder Ihre innovative Idee mit uns.

Bezeichnung Geschäftsmodellidee

Bitte beschreiben Sie das Problem, das Sie durch das neue Geschäftsmodell lösen.

Geschäftsmodellbeschreibung

Bitte beschreiben Sie Ihr Geschäftsmodellidee. Geben Sie gerne Links zu Ihrer Homepage, Zeitungsartikeln und so an. Ihre Idee kann anderen Unternehmen helfen gestärkt aus der Krise zu kommen!

Tipps und Tricks

Bitte beschreiben Sie weiche Herausforderungen bei der Umsetzung aufgetreten sind und wie Sie diese gemeistert haben. Welche Tipps und Tricks können Sie anderen Unternehmen mit auf den Weg geben?

www.weareopen.business
RESULTS

>200  business model innovations analyzed

23   business model patterns in times of crisis

6    business model categories

1. Combination of different patterns?
2. Evolution of business model pattern?
   Effectiveness of patterns?
3. Barriers to implement patterns?

NEXT STEPS
WHAT’S NEXT?!

Adding new patterns:
Crowdsourcing competition to find innovative business model patterns to overcome the crisis.
https://businessmodels.hyvecrowd.com/contest/157/overview
(Submission phase currently running)

Building an Open Innovation Ecosystem:
Companies should not only use our homepage as a library for resilient business model patterns, but share their own business model innovation or their experiences of applying the patterns.

Deriving generalizable findings:
By analyzing the contributions and the exchange between different companies on our platform, we want to derive scientific findings in order to contribute to existing theories and discussions in science.
